

Access to education is a universal right but sometimes school environments can have barriers for children with disabilities to participate and learn

With your help, we can adapt our school to fit all children's needs and include children with disabilities in school activities!

Let's make our school inclusive together!

Children with disabilities may sometimes need a little more help than other children.

But they feel emotions and have talents and difficulties like everyone else. And they deserve love like all children!

Together, we can help them live a happy and productive life!

Children with developmental disabilities are welcome in our community!

Developmental disabilities are neither a contagious disease nor a curse!
They are a way of being.

Enabling children with disabilities to be included in our community allows them to develop to their full potential.
